

# Baytown Town Square

## Project Description

Knudson worked with the City of Baytown to design and build a new Town Square for the expansion of the City's Park Department programming. The design of Town Square encompasses one city block and will include features such as a fountain, seating and lawn areas, as well as a food truck court and an amphitheater.

In addition to the Town Square, the roadway adjacent to the square will also be reconstructed to provide a more pedestrian friendly atmosphere and will include new street trees, architectural light poles and site furnishings.

During the winter months, a temporary ice skating rink will be installed and extensive holiday lighting is planned. This year round space will continue to revitalize downtown Baytown for years to come.

### Client:

City of Baytown

### On-Going

### Services:

Landscape Architecture

### Principal In Charge:

Patti Joiner

### Project Manager:

Bryan Janhsen
