

Texas Avenue Streetscape

Project Description

Knudson worked with the City of Baytown on a redevelopment and revitalization plan for Texas Avenue. Historically, Texas Avenue has been the center of commerce for the City of Baytown. The goal of the project is to create an environment that once again makes Texas Avenue a viable center of commerce for the City of Baytown. The scope of the project includes the replacement of all subsurface utilities, parking reconfiguration and street re-paving. As part of the re-paving effort, the existing sidewalks will be widened and improved in order to create a more pedestrian friendly environment. Other improvements include the addition of street furniture, decorative lighting, special paving accents, street trees and landscaping.
