

Galveston Park Board Tourism Transportation Study

Project Description

The purpose of the Tourism and Business Development Transportation Study is to identify potential traffic relief solutions from existing traffic congestion issues that impact tourism and economic development. The study will include the role of transportation in supporting tourism and economic development. The Plan is intended to guide the Park Board and City of Galveston in developing short-term and long-term recommended solutions for further design to relieve congestion, and recommend options for intra-island connectivity.

Knudson was responsible for analyze existing conditions inventory to determine areas of opportunity for transportation improvements, prepared recommendations from all data collected, and determine a timeline and hierarchy of each recommended improvement.
