

City of Pasadena Police Complex

Project Description

Knudson, LP assisted Morris Architects with site planning and landscape architectural services for the new Pasadena Police Complex. Site plan elements were arranged in such a way to preserve several specimen trees on site.

In addition to site planning, Knudson's role also included creating outdoor seating and gathering spaces for visitors and employees to utilize. The planting design responds to the symmetry of the building's architecture and provides softening and shade around the sites plazas and seating areas.
