

University of Houston Shea Street Business School

Project Description

Knudson, in collaboration with PGAL Architects worked on the design for the new 4-story, 132,500 SF Academic Building at the University of Houston – Downtown Campus. This design-build project, located in an urban area adjacent to downtown Houston, was designed to reinforce the physical and aesthetic connection to the U of H – Downtown Main Building. Knudson's role as Landscape Architects involved overall site design, landscape planting and irrigation design, along with collaboration with a team of engineers to create the tiered planters along the building's main entry.
