

Watco Companies, LLC Drainage Fee Appeal

Project Description

Knudson, LP represented Watco Companies, LLC to the City of Houston with regards to an application for appeal of charges for the City of Houston Drainage Fee. Integral to the appeals effort were the detailed maps created in GIS by Knudson in order to display the private property boundaries, City of Houston boundaries, and special district boundaries. Knudson used these maps to calculate potential drainage fees based on ad valorem tax rates and impervious cover and was successful in garnering an immediate refund of over \$75,000 for our client as well as a permanent reduction in fees collected moving forward. See Watco's [Letter of Recommendation](#) for our services.
